

Technology with infinite reach, helping pharmacists improve patient care.

The Food and Drug Administration's (FDA) Drug Supply Chain and Security Act (DSCSA) requires electronic tracking and tracing of all dispensed prescription drugs. Pharmacists are fully accountable to new standards of receiving and maintaining drug purchasing data. **Are you ready?** At InfiniTrak, we have been following the development of these regulations since they began in 2012. As we began to design our software solution, we looked at the situation from the point of view of the dispenser - and independent pharmacies in particular. The result is a cost-effective, easy to use software that will save time and money, increase productivity, ensure full compliance, and provide the peace of mind that comes from knowing that all of your data is at your fingertips, when you need it.

Our Solution

- Cloud based (Microsoft Azure), secure web-accessed portal.
- Supports the required FDA product tracing information electronically: Transaction Information (TI), Transaction History (TH), Transaction Statement (TS) verification, storage, and retrieval.
- Electronically create and transmit FDA and other government reports as required.
- Software-as-a-Service (SaaS) pricing, pay for only what you need and control software costs.

Your Leverage

- Leverage the latest technology to be an industry leader.
- Comply with government regulation while opening new efficiencies that add business value.
- Be a part of a solution that enables safer dispensing of pharmaceuticals.
- Provide patients with the assurance that they have received authentic, safe products.

The Impact

- Comply with the DSCSA, governmental reporting and other track and trace regulations quickly and efficiently.
- Set yourself apart as an early adopter of innovative technology and solutions.
- Protect against lost revenues that might result from counterfeit, theft and other leakages in the supply chain.
- Increase profits through the added value that InfiniTrak offers.

Your InfiniTrak Team

The InfiniTrak team comes from an impressive range of backgrounds and education. Our diversity of disciplines and career paths ensures that our approach considers all angles. We know that DSCSA is, to say the least, a complex law and brings significant change to the way most pharmacies will track and trace their products. As the industry builds an electronic, interoperable system to identify and trace the distribution of certain prescription drugs in the United States, tools must be focused on efficiency, flexibility, affordability, and, above all else, compliance.

InfiniTrak enables you to be compliant with the FDA and add additional value to your customers. Our team of consultants and business partners deliver the highest quality business consulting services. Combined with the power of technology and dedicated support, we are here to guide you to infinite success.
